## **Emerging from the COVID-19 pandemic - Professional help for MSMEs**

### **INSOL Global Consultation Network**

INSOL International is launching a new initiative to assist micro, small and medium sized enterprises that are in financial distress. The objective is to provide distressed enterprises with an opportunity to get professional advice and help before it is too late.

INSOL International has 10,000 members across 102 countries. Most of our members are highly experienced and well-known insolvency professionals in their respective countries. We are therefore ideally placed through our extensive network to introduce these insolvency professionals to MSMEs that are genuinely looking for advice and assistance.

If you would like to volunteer to initially provide 1 – 2 free consultations to MSMEs that may approach you via our network, please register your details using the link below.

If the MSMEs thereafter wish to pursue and seek further advice, please feel free to negotiate terms and conditions and INSOL will not be involved in this subsequent process.

The information we collect will be shared extensively in the form of an easy-to-use global network, and shared with all INSOL members as well as non-members. In this way, MSMEs that are seeking assistance will be able to reach out for help without delay.

I hope you would like to be part of this global initiative.

With best wishes
